CERTIFICATE OF OWNERSHIP

About Symantec.....

Symantec Corporation was founded in 1982 and is located in Cupertino, California. It has many foreign office locations and a well defined international distribution network for our customers worldwide.

Through a number of product developments and acquisitions over the years, Symantec has increased its software product line to include application, utility and development products, most of which are the leaders in their respective markets.

Our commitment is to developing software which is easy to use and which, most importantly, will significantly enhance your productivity.

You are now the owner of a Symantec product, and we would like to provide you with excellent service and support.

By registering your product, you will receive:

Technical support
Advance upgrade and update information
Special promotions and offers
Information about training and seminars

Please take a moment to complete the attached registration card and send it to the Symantec office located nearest you, using one of the address labels we have provided. We look forward to hearing from you and thank you for purchasing a Symantec product.

IMPORTANT !!
PLEASE REFER TO THE LABEL ADDRESS SHEET
AND AFFIX YOUR LOCAL ADDRESS LABEL.

SYMANTEC.™

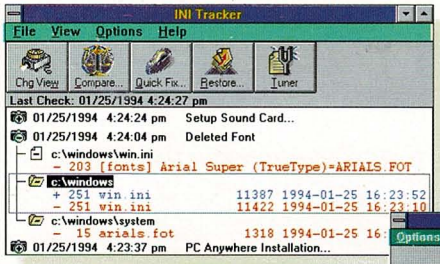
THE NORTON UTILITIES™

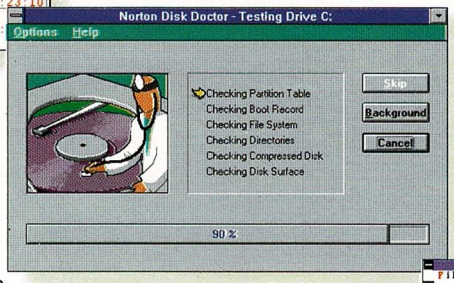
Classic Utilities, Great New Tools, and Windows Too!

The Norton Utilities 8.0 contains all the powerful tools that have made it the worldwide standard for data protection and recovery—plus significant new features and enhancements. And now Norton applies its award-winning expertise to Windows-specific problems, including Windows restoration.

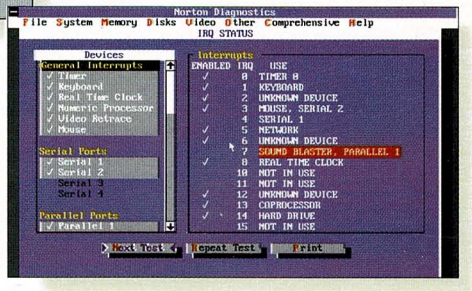
Now more than ever, the Norton Utilities is absolutely essential for serious PC users.



Track vital setup changes for quick analysis and repair



Enjoy continuous background protection with the new Disk Doctor for Windows.



Prevent hardware conflicts with our new Interrupt Conflict Analysis.

New! Windows/DOS Recovery

Quickly recover damaged systems from DOS or Windows by restoring previous configurations using a configuration history and an intelligent reference to documented and undocumented system settings. Recover data from difficult situations even when damaged systems prevent DOS or Windows access.

Improved! Compressed Drive Support

Disk compression is inherently fragile—so the Norton Utilities supports the widest range of compression formats, under both DOS and Windows.

Tools for Maximum Performance

Maximize and fine-tune system performance with Ncache, System Watcher, and a newly enhanced version of Speed Disk.™ Increase productivity with our exclusive DOS prompt companion NDOS, providing more help, more commands, and extended file descriptions.

New! Continuous Background Operation

Breakthrough technology runs disk optimization and file-system analysis and repair continuously in the background. This technology proactively prevents problems and significantly increases the chances of full data recovery in the event of a crash or disaster.

Improved! Advanced Hardware Diagnostics

Protect data and software with advanced testing and certification of vital system components. New Interrupt conflict testing helps eliminate unexpected lockups and makes it easy to install new devices.

The Norton Utilities–the world's most advanced and most effective utilities. Why settle for anything less?

BE SAFE, NOT SORRY!

Peter Norton's award-winning technology recovers data where other utilities packages can't, and is your best bet for 100% data recovery. But remember: Installing the Norton Utilities before you start working significantly increases the chances of full data recovery.
